

LOCK SPORT VILLAGE

Australian Cyber Conference Melbourne 2023

Presented by

Supported by

The lock sport village workshop welcomes you to drop-in and experience something new. Open to all, the workshop allows participants to explore the art of lock sport at their own pace, with guidance available for lock sport ranging from simple one-pin models to intricate six-pin versions, including those with security pins. Skilled trainers are on hand to provide insight into the techniques needed to manoeuvre through these mechanisms, emphasising the tactile connection and understanding that's essential for mastery. The hands-on approach encourages exploration, and the community-driven atmosphere fosters collaboration and shared learning.

As attendees move through the workshop, they can challenge themselves with progressively complex locks, each step offering a deeper connection to the art of lock sport. Interactive displays and hands-on stations enable a tangible understanding of what's happening inside the lock. The environment ensures that every participant, regardless of skill level, can find something to challenge themselves with.

Those who feel they have mastered the workshop are encouraged to enter our speed lock sport competition, open to anyone who wishes to participate. This friendly contest provides not only the thrill of competition but also the chance to win exciting prizes.

O P P O R T U N I T I E S

LOCK SPORT VILLAGE

Australian Cyber Conference Melbourne 2023

Presented by

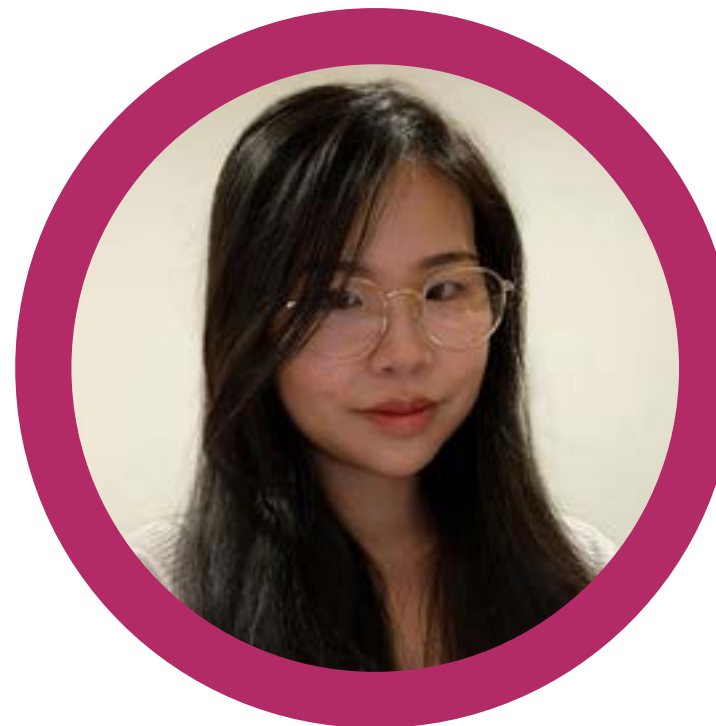

Supported by

Melody Lei

Mel is a managing consultant at Tesseract where she hires talented people and then gets out of the way. She has previously spent over 10 years in other penetration testing roles with companies around the world. She also holds a degree in Mathematics. She enjoys researching and learning about RFID systems, especially the various vulnerabilities in different implementations. In her spare time Mel is one of the organisers for both TOOOL Australia and the OzSecCon conference.

Jo Zhou

Jo is a Security Specialist in Atlassian's Red Team. Jo brings over 6 years of lock sport experience to the table. She's assisted in running OzSecCon since 2017 and has also been involved in running workshops and classes for red team training and lock sport across Australia. Jo is a highly skilled at lock sports and has a deep understanding of the techniques required to attack various types of locks.

LOCK SPORT VILLAGE

Presented by

Supported by

Simon Pascal

Simon is a graphic, web and front-end designer for BugCrowd and has been a key member of the lock sport community in Australia for almost 10 years. He's one of the founding members of OzSecCon and has participated in teaching lock sport workshops at multiple major Australian conferences such as AusCERT, BSidesCanberra and PlatypusCon.

Alannah Guo

Alannah is the Director of Airglow Security, but still a security consultant at heart. Her fondness of lock sport, red teaming experience, as well as involvement with OzSecCon has given her the breadth and depth of knowledge that has led her to teach lock sport at major Australian conferences such as BSides Canberra and 0xCC. Alannah is passionate about physical security and loves sharing her interest with others.
